Kemet

Pressure Relief Valve Lapping Kit

Incorrect lapping and or the use of improper equipment is a major contributor to seat leakage, which in turn leads to high emission rates and costs in loss of process. Kemet have produced a lapping kit that can be used on Tyco, Crosby, and Anderson Greenwood pressure relief valves.

The kit consists of:

- 15 Lapping / Polishing blocks, double sided (D through T2 orifice sizes).
- 1 x Applikator of 3 Micron Kemet Diamond Compound.
- 1 x Applikator of 14 Micron Kemet Diamond Compound.
- Bramet Silicon Carbide self adhesive papers. Grades 60, 120, 180, 320 Grit.
- Housed in strong plastic case (weight approx. 11.5kg)
